**YES — 4 HIGH-confidence
findings**

INVESTIGATION WINDOW

2025-07-22 → 2025-07-22

A forensic investigation was conducted on evidence from the target system. Analysis identified 4 HIGH-confidence findings indicating malicious activity. The investigation utilized the Hermes Forensics Agent platform with multi-runtime tool validation (session canary: 9/9 PASS).

Chronological reconstruction of events from memory forensics artifacts. Color-coded by event type. Hover cards for source details.
